

NTN®**BOWER®**
An NTN brand manufactured in the USA**PRODUCT SPEC SHEET**

TAPERED ROLLER BEARINGS

BUS & TRANSIT

Rising operational costs and tightening budgets mean that uptime is more critical than ever. That's why it's essential to partner with a world leader in bearings. NTN-Bower® is committed to serving the transit market by providing a complete line of quality American-made product with unsurpassed local availability.

Local Production

Ever since R.F. Bower patented his newly designed roller bearing back in 1904, we continue the proud American tradition of craftsmanship and product excellence. Today, NTN operates two manufacturing plants dedicated to the production of roller bearings – Macomb, IL and Hamilton, AL. NTN Bearing Corporation of America operates six more state-of-the-art plants in North America. All case carburized BOWER® bearings sold in the USA are locally produced.

Local Inventory

In order to ensure prompt, off-the-shelf service at any time, we maintain local inventory of BOWER® bearings in a large range of sizes. Our extensive network of distributors across the country is ready to meet your demanding delivery schedules and help reduce your freight costs.

Complete Coverage

With more than 100 years in the industry, NTN's broad range of sizes means you can turn to one manufacturer for all your bearing needs.

Features & Benefits

- Genuine BOWER® Quality made in America
- OEM preferred
- Case carburized steel
- Super finished rollers & raceways
- Longer service life
- Unmatched local inventory

NTN's uncompromising quality and reliability will help maximize your uptime and reduce maintenance costs.
