

NTN Single Point Lubricators

NTN offers 3 types of single point lubricators: Ready, Smart and Drive. Each responds to different applications: humid environments, variations in temperature, situations requiring a specific amount of grease, either remotely or physically at the point to be lubricated.

READY

This gas-powered unit (size 60cc or 125cc) is the ideal economic solution for difficult, humid or dangerous environments, or those environments exposed to corrosion or requiring maximum levels of hygiene. The length of time for distribution of the grease can be adjusted from 1 to 12 months via an activation dial.

SMART

This electromechanical unit (size 65cc and 130cc) is intended for areas where there are wide variations in temperature. It is the first electrochemical self-lubricator that is equipped with a reusable control unit. The length of time for distribution is very easy to adjust to the closest month (from 1 to 12 months) by selecting the appropriate period on the control unit.

DRIVE

This electromechanical unit (size 60cc, 120cc or 250cc) features remote mounting capabilities that solve lubrication needs in dangerous or difficult to access areas, such as those applications subjected to severe vibrations or high ambient temperatures. It is a tool that is powerful, fast and easy to program (usage period of 1 to 12 months, modifiable and can be stopped at any time), allows for extremely precise lubrication that is independent of the temperature and ambient pressure, and has a high operating reliability. Built in LED lights that are visible around the entire unit help easily identify the operating status.

Beyond Bearings

**Training. Installation Support.
Trouble-shooting. And more.**

When you choose NTN, your team is equipped with all the necessary tools and resources to get the job done right. From installation to problem-solving, we'll be there with the hands-on support you need to take on your toughest challenges. This includes extra services such as:

Technical Training Unit

On-site, mobile training unit offering specialized, hands-on instruction from NTN engineers

Product Training School

Three days of in-depth instruction from NTN engineers at NTN headquarters
(go.ntnamerica.com/trainingschool)

eKnowledge

WEB-BASED TRAINING PROGRAM

Six online product training modules covering different bearing types and nomenclature
(www.ntnamerica.com/eknowledge)

NTN Bearing Finder

Customizable search tool featuring exhaustive data sets, comprehensive part interchanges and interactive CAD drawings
(bearingfinder.ntnamerica.com)
